Professional Book Study

Blended Format - (Google Classroom)

Mandatory Face to Face Orientation

Thursday, June 13

11:30-12:15PM or 12:15-1:00PM

Course Descriptions

Mindset in the Classroom

The Growth Mindset is changing the face of education. Critical to student success, learn how to create an environment in which students will embrace challenges and learn from their own mistakes. Develop the optimal learning classroom culture with the goal of improving student achievement.

Culturally Responsive Teaching

Recognize the importance of including students' cultural references in all aspects of learning. Culture is central to learning, impacts communication, and shapes thinking processes. We can raise the achievement of all students, including groups traditionally identified as underachieving. Immediately incorporate research-based suggestions to create a positive learning environment for all.

CALM: Cultivating Awareness, Longevity and Mindfulness in Education

Neuroscience has offered evidence to support a holistic message about cognitive, social, and emotional development. Educators will not only gain an understanding how mindfulness affects their actions in the classroom, but how it impacts their relationships with their students and their student's relationships with their education, themselves, and others.

Course Descriptions

Critical Thinking Through Questioning

Dig deeper into the research of Ron Ritchhart to create a culture of thinking in the classroom. Identify ways to prioritize time around student learning, look closely at the influence of the language of learning, and reflect on the classroom environment as hidden curriculum.

Fostering Resiliency in the School Environment

Traditionally, educators are required to teach students core curriculum (e.g., reading, writing, math, science, social studies, etc.); however, the expectation has now expanded to include social/emotional learning. It is the goal of this course to provide educators with a working knowledge of resiliency and coping skills that can be applied in classrooms to improve student achievement and performance.

Motivating Our Students

Motivating students is one of the greatest challenges educators face. Explore practical applications for motivating students, examine current theories and practices, and design a plan to motivate your own students.

Professional Book Study

Mindset, by Carol Dweck

Teaching with Poverty in Mind, by Eric Jensen

Happy Teachers Change the World, by
Katherine Weare
and Thich Nhat Hanh
