

SUMMER SCIENCE INSTITUTE: ENERGYSMART EDUCATION

CRAFTING OUR ENERGY LANDSCAPE

presented by CCSD CPD, RPDP & DRI Science Alive

Our week-long intensive institute will focus on the development of system models to explain the current electrical energy landscape of Nevada and make predictions about the best solutions to our future energy needs. The crosscutting concept of systems and system models will be our central lens to better understand Nevada's power supply and demand. We will conduct simulations, investigations, enjoy a field trip to Hoover Dam, consult with energy experts, and use system models you develop to make claims about the best energy solutions for the future. The institute will conclude with presentations and take-aways that you can incorporate into your classrooms.

WHO:

Secondary science teachers (Middle & High)

WHEN:

**June 3-7
8 am - 3:30 pm daily**

WHERE:

CCSD Curriculum and Professional Development Division Offices

**3950 Pecos-McLeod Interconnect,
Las Vegas, NV 89121**

IT'S FREE AND LUNCH IS PROVIDED!

Should you have any questions about this workshop, please contact Craig Rosen at craig.rosen@dri.edu or (702)-862-5332.
